

Job Title: Full Stack Software Engineer

Company Summary:

ELGO AI is a fast-growing startup redefining how enterprises build and deploy AI. We offer a powerful no-code GenAI platform that enables organizations to create custom LLM-powered applications such as chatbots, smart document workflows, and automation agents 10x faster than traditional methods.

Our mission is to simplify enterprise AI adoption by making advanced GenAI capabilities accessible to non-technical teams. We are passionate about workflow orchestration, context-aware agents, and enterprise-grade deployment, all grounded in responsible, secure, and user-centric design. Our vision is to become the go-to platform for practical AI solutions in Asia Pacific.

Job Description:

As a Full Stack Software Engineer, you'll be instrumental in developing and maintaining our suite of AI-powered applications. Your role involves working across the full technology stack, from database management to front-end development, ensuring seamless integration and functionality. You will be at the heart of our development team and also a core member of the founding team, contributing directly to projects and product strategy that embody our commitment to ethical AI and user-centric design.

Roles & Responsibilities:

- Design, develop, and maintain full-stack AI applications.
- Collaborate with cross-functional teams to translate business needs into technical specifications.
- Implement responsive UI/UX designs for an optimal user experience.
- Develop and maintain databases and server-side applications.
- Ensure code quality, sustainability, and scalability.
- Troubleshoot, debug, and upgrade existing software.
- Stay up-to-date with emerging trends in software development and AI technologies.

Requirements:

- Bachelor's degree in Computer Science, Engineering, or related field.
- Proven experience as a Full Stack Developer or similar role with at least 2 years of relevant working experience.
- Knowledge of multiple front-end languages and libraries (e.g., HTML/ CSS, JavaScript). Main frontend: **React.js**
- Familiarity with back-end languages (e.g., Python, Ruby, Java, Golang). Main backend: **Golang**
- Experience with database technology (e.g., PostgreSQL, MongoDB, NoSQL DBs).
- Good working knowledge of Cloud Platforms (e.g. Azure, AWS, GCP) and DevOps (CI/CD, Docker).
- (Optional) Good understanding of AI and Gen AI technologies and concepts.
- Customer-centric mindset.
- Strong problem-solving skills and willingness to learn new technologies.
- Excellent communication and teamwork skills.
- Prior experience in developing custom enterprise solutions highly preferred.
- Willing to proactively voice opinions and thoughts on the business.
- Self-driven and proactive learner.

What We Offer:

- Opportunity to work in a vibrant tech startup environment.
- Exposure to cutting-edge AI technologies and ethical AI practices.
- A supportive, inclusive, and dynamic team culture.
- Opportunities for accelerated professional growth and development.
- Opportunity to work on interesting projects with high business/social impact.

ELGO AI is committed to equal employment opportunities and welcomes applications from all qualified candidates.
